Figure 6

Windows 2000 / XP OS Device

➢ **System Requirements**

- ■ A computer with the Microsoft Windows 2000 / XP operating system.

- ■ At least 4 MB free memory on your PC.

- ■ Determine that your PC is Bluetooth-enabled with either a built-in Bluetooth component, or via an external hardware adaptor (Dongle)

➢ **Before Use**

- ■ Push the power switch to leftward for HID mode and blue light on the keyboard(Fig 1).

Fig 1

- ■ Please turn the software off which is using Bluetooth Serial Port Profile of your PC.

- ■ Ensure that the accompanying Bluetooth software (Stack) is installed.

  1. If your PC is running Windows XP Service Pack 2(SP2) the Microsoft Bluetooth Software is built-in. You don't need other Bluetooth Software

  2. If your PC is running Windows 2000 OS then please install **WIDCOMM** (**Broadcom**) or **BlueSoleil** (**IVT**) Bluetooth Software first

➢ **Search, Pair and Use the Bluetooth Mini keyboard**

Use the Bluetooth of the PC/NB to search the Bluetooth Mini Keyboard. Once the connection is built up between the PC/NB and the Mini Keyboard, then you can start to use the keyboard to input data.

➢ **Disable HID Bluetooth Keyboard IP Code :**

A. Bluetooth Mini Keyboard HID Mode will auto-memorize the IP code of the PC when the Bluetooth connection built up. Then the BK300 is connectable and discoverable by this PC only. If you want to build up the Bluetooth connection with other PC, you should disable the Bluetooth IP code of the Bluetooth Mini Keyboard first .

B. How to Disable the Bluetooth IP code :

Please press below 3 keys **in sequence**.

"**Fn**" → →

When you press these 3 keys at same time, the Bluetooth connection will be interrupted. It means the Bluetooth IP code is disabled and the Mini keyboard will be discoverable and connectable by other PC.
