### Product Overview

Designed for an active lifestyle, Clip&GO! Bluetooth Stereo Headset combines the stylish design and reliable technology in the ideal mini size units. With Bluetooth wireless technology, Clip&GO! gives you the convenient wireless way to enjoy the streaming stereo music transmitted from the Bluetooth A2DP-Source device such as a mp3 player, PC or PDA in the available range. Moreover, you can use Clip&GO! to remote control the music playing functions of your Bluetooth device if it supports Bluetooth AVRCP in addition. Switching between music and phone calls, Clip&GO! also allows you answer or make calls with the Bluetooth-enabled mobile phone while you are listening to music. After you ended the call, the music will follow to be streamed in few seconds. Besides the wireless stereo and mobile hands-free applications, you can apply the Clip&GO! to the Bluetooth-enabled PC with the Internet messenger such as Skype, MSN Messenger or Yahoo! Messenger.

### Notes:

1. The playback or its plug-in Bluetooth adapter/transmitter needs to support Bluetooth A2DP (Advanced Audio Distribution Profile).
2. The playback or its plug-in Bluetooth adapter/transmitter needs to support Bluetooth AVRCP (Audio Video Remote Control Profile).
3. The mobile phone needs to support Bluetooth HSP (Headset Profile) or HFP (Hands-free Profile) support Bluetooth A2DP (Advanced Audio Distribution Profile).

### How to use Clip&GO!

#### Pairing

Pairing is the process of establishing encrypted link between Clip&GO! and Bluetooth devices.

1. In the off state, press and hold multifunction key for about 8 second until the red and blue LED flash alternatively.
2. Follow the operating instruction of your Bluetooth mobile phone to start the pairing process. Typically, this is done by going to a "Connect" or "Setup" menu and then selecting the option to search the Clip&GO! that is still in the pairing mode
3. The mobile will find Clip&GO! headset and ask whether you are willing to connect your mobile with the headset. Press "Yes" or "Confirm" to confirm this action.
4. The mobile phone's display should then prompt you for a passkey or PIN. Enter 0000 (a sequence of four zeros) and the display should prompt the pairing result. If the connection is successful, the blue LED of the headset will flash 3 times. Then blue LED will flash one time every 7 seconds. If the pairing is unsuccessful, please turn off the headset and turn it on again. Then, return to Step 1 and do the pairing procedure again.)

#### Make a Call

1. Use the mobile phone's keypad to dial the phone number.
2. Press mobile phone's "Send" or "OK" key. The mobile phone initiates the call and transfer the call from the mobile phone to the headset Normally speaking if there is no disturbance between headset and mobile, the voice quality is better.

#### Voice dialing (dialing a number by saying a name)

It is possible to make a call directly from the headset using voice recognition. To use this voice dialing function, your mobile phone must provide this option and corresponding voice samples must have been recorded.

1. Press the multifunction button of the headset one time, you will hear a beep prompt.
2. When you hear a short tone, say the name of the person you wish to call loudly.

#### End a Call

Use either of the following methods to end a call.

**Method 1.** Press multifunction key one time to end a call from the headset.

**Method 2.** End a call from the mobile phone's keypad.

In the meantime you are answering or making a call, the headset will switch the connection from the music player (A2DP) to the mobile phone (HSP or HFP); moreover, the streaming music will be paused temporarily. After you ended the call, the music will be played and streamed to the headset continuously.

#### Answer a Call

1. If there is an incoming call while you are listening to the streaming music, you will hear beep prompt from headset.
2. Just press multifunction key one time.

**Notes:** When you press multifunction key to answer or end a call, please just press one time. Do not press and hold.

#### Adjust volume

You can press the four-direction button of volume +/- key to adjust volume.

#### Redial the last dialed number

Press and hold multifunction key for 2 second to redial the last dialed number.

#### Trouble shooting:

If disconnection occurs, please check the following factors:

1. Ensure that the headset has enough power, is turned on and has been successfully paired to the mobile.
2. The Bluetooth function of the mobile is enabled.
3. Check whether the range between the headset and mobile is over 10 meters (about 30 feet.) Or there is wall or other disturbance or other electrical devices between headset and mobile.

#### Battery and Charging Notice

We use rechargeable battery for Clip & GO!. Please make sure the battery has been fully charged and fully released when the beginning of three times use it for keep the battery has the best performance.

Always use correct AC Power Adapter to charge the headset. Using any incorrect power supply device will cause damage and void the warranty.

After finished charging, please pull out the cable from the headset and plug the adaptor from the electricity outlet. Do not put the headset in charging state for a long time. This will shorten the lifetime of the battery.

Do not use the headset in too hot or too cold environment. Do not install, place or use the headset near any source of heat such as a stove, radiator, oven, toaster, coffee maker or other apparatus (including microwave oven) that gives off heat
